Importing Custom POIs for Rand McNally2.0 Devices

This process must be done with a computer/laptop

Custom POIs can be imported to a device in CSV formatted files. (commonly Excel files)

1. Prepare the custom data in a CSV format file. Each row should have the following eight columns: LONGITUDE, LATITUDE, NAME, STREET, CITY, STATE, ZIP, COUNTRY

- These column names (also known has a header) must NOT be included in the CSV File.
- The LONGITUDE, LATITUDE, and NAME columns ARE required.
- If any other column values do not exist, commas are required in those empty cells.
- If a column value includes a comma, then the value should be surrounded with apostrophes.
- All values may be surrounded with apostrophes if desired.

For example:

AutoSave 💽	l 回 日 り	<u>ା ମ</u> ାନ୍ତି କରୁ		Bool				, p s	earch							
File Hom	e insert	Page Layout Formulas	Data Re	eview View	Automa	te Help
